AI-native engineer specialized in knowledge graphs, custom agent orchestration, and autonomous loops, with a decade of data science grounding across pharma, energy, defense, and finance. Builds and ships production agentic systems solo using an AI-augmented workflow (Claude Code, Codex) that matches the output of a multi-person team - most recently an autonomous SEO/content platform (Flaex AI) that reached 60,000+ organic impressions in under 3 months. Seeking a high-ownership Applied AI Engineer role.

Core Competencies

- **Agentic AI & Orchestration:** Knowledge graphs, custom agent orchestration and autonomous loops, LLM orchestration (OpenAI, Claude), agentic workflows (DSPy), RAG
- **AI-Augmented Development:** Claude Code, Codex, Cursor - ships production systems solo at multi-person-team velocity
- **Full-Stack Engineering:** Next.js, React, TypeScript, Tailwind CSS, Node.js
- **Backend & Data:** Convex, Supabase, PostgreSQL, Prisma, Medusa.js, Python
- **Cloud & DevOps:** Vercel, AWS, GitHub Actions, CI/CD, Docker

Professional Experience

- **Self-Employed (Creava AI, IdeaSignal, Flaex)** **Remote / Global**
Founder & Lead AI Engineer *2020–Present*
 - Architected and deployed multiple agentic full-stack applications from concept to production, focusing on autonomous AI workflows
 - Built Flaex AI (Next.js, Convex): custom AI orchestration layer scraping and structuring data from hundreds of SaaS/AI projects, plus an agentic auto-newsletter and LLM auto-blog pipeline; grew to 60,000+ organic impressions and Domain Rating 42 in under 3 months
 - Implemented an AI-augmented development workflow (Claude Code, Codex, Cursor, custom agents) to maintain multi-person-team output as a solo builder
 - Developed IdeaSignal (AI-powered market validation tool) and Creava (AI-driven creative content platform)
- **Virtutela** **Remote**
Lead Developer / Senior Full Stack Engineer *2025–Present*
 - Owned the full development lifecycle of a headless AI fashion e-commerce platform (Medusa.js), from architecture to deployment
 - Proposed and built a custom stack over an off-the-shelf alternative, cutting monthly infrastructure cost by more than half while adding room to scale
 - Engineered AI-powered features: Virtual Try-On, AI Stylist recommendations, hyper-personalized "Page for You"
 - Built a custom admin dashboard for real-time inventory, orders, and analytics; integrated Stripe payments; shipped an MVP at 90% of intended scope
- **Ministère des Armées** **Versailles, France**
Head Assistant & Data Analyst *03/2019–03/2020*
 - Designed high-stakes executive dashboards and data pipelines for operational military maintenance
 - Optimized data visualization layers for immediate decision-making in high-pressure environments
- **Roche** **Boulogne-Billancourt, France**
Data Manager (Data Science focus) *10/2016–05/2018*
 - Developed custom web applications using Python and Shiny R to automate healthcare compliance data workflows
 - Led cross-functional data quality assurance, cleansing, and validation for large-scale clinical datasets

- **EDF** **La Défense, France**
Data Analyst (Machine Learning) *09/2015–09/2016*
 - Executed a comprehensive Machine Learning audit using H2O to evaluate and optimize model performance
 - Developed predictive appetite scores and indicators using statistical modeling to drive IS project specifications
- **HSBC / 1000mercis** **Paris, France**
Data Analytics Specialist *2013–2014*
 - Automated dashboarding and customer segmentation logic for high-volume financial data
 - Validated large-scale annotated datasets, ensuring adherence to strict quality and compliance standards

Education

- **EFREI / PSB Paris School of Business** **Paris, France**
MSc Data Management *2016–2017*
 Joint program.
- **ESIAG** **Paris, France**
Master Miage (IT & Project Management) *2014–2016*
 Méthodes Informatiques Appliquées à la Gestion d'Entreprises, Gestion de Projet.
- **Université Paris Descartes** **Paris, France**
DUT STID (Statistics & IT for Decision-Making) *2012–2013*
 Statistiques et Informatique Décisionnelle.

Languages

- French (native), English (professional/C2), Mandarin Chinese (elementary/A2).

Publications

- Ung, S. (2016–2018). “L’Open Data Transparence-Santé au service de la Healthcare Compliance.” Professional thesis, Roche.

Honors and Awards

- **Winner** – Internal EDF Machine Learning Hackathon.
- **Top 4** – ShipFast AI Hackathon.
